June Newsletter

Key Message

We wanted to say congratulations to Her Majesty The Queen on celebrating her Platinum Jubilee. The first British Monarch to be in service for 70 years, that is one long employment record! We hope all our customers and staff enjoyed their bank holiday weekend away with family and friends.

Key News

Naylor Drainage have recently announced they will no longer be manufacturing Densleeve clay pipes and fittings. With our in-stock clay to plastic adaptors you can easily switch systems, and take advantage of our wide range of Polypipe underground in both 110mm and 160mm. We are looking into alternative suppliers to ensure we have clay pipe stock.

In addition to our existing stocks of civils drainage and attenuation crates, we have now introduced an even wider range. This includes Twinwall up to 300mm, Metro access boxes, plus an increased range of solid and flexible duct for gas, water, and electric. Many of these items will be available from your local branch, but if not, they can be accessed from our central stocking facility at 48 hours' notice.

Some fantastic news for the Queens Medical Centre Nottingham, which has been awarded over £70m of the £553m decarbonisation fund. Decarbonisation is no longer the future, it is happening now. Manufacturers are looking into new or improved products that are low carbon, produced from 100% recyclable material, and competitive in the market.

The UK are currently experiencing a nationwide shortage on LPG bottles. This is due to high demand and restricted supply. We have negotiated an additional 50 bottles, and these will be available to customers on a first come first served basis.
